## Today's question

Before you go and interview the Hinjewadi manager, what do you check?

## Bonus question

Day 9 had a version of this problem. What is the connection?

My Answer

# “ Before credit the manager count the trading days . ”

Hinjewadi store month over month performance

**30 Days traded**

### Count the operating days

August 20 days vs September 30 days

### Compare daily revenue

Total divided by days traded

### Check holidays & other stores

If they grew, it is seasonal demand

**“ Fewer trading days in August made September’s growth appeared ”**

Bonus Answer

# “ Same problem both times: Unequal trading days ”

## Day 9 | Yelahanka’s trading days

Koramangala / other stores — 31 days

Yelahanka — 22 days

Comparing stores on total makes fewer-day stores look weak.

Ranked last on total

## Day 20 | Hinjewadi’s trading days

Hinjewadi | August — 20 days

Hinjewadi | September — 30 days

Closed 11 days for a refit, so the next month looks strong.

Up 58 % Month over Month

Day 20 lesson

**When a number looks too good,**
**the first suspect is the denominator, not the business.**
