AtliQ Café

P

Priya - Founder

Online

Wednesday

Sachin “ Board wants to approve five new outlets for next year. ”

8:05

Where should they go, and what will they be worth? You have until Thursday.

8:05

Next year - 5 outlets

Today’s question

Walk through it. What do you do first, second, third, and what do you refuse to start until you have an answer?

Bonus question

One part of this request cannot be answered with AtliQ Café's data at all. Find it.

My Answer

“Define it. Learn from it. Then price it. ”

Ask what ‘worth’ means.

1

Rank the 40 stores by contribution. Find what the best ones have in common.

2

Estimate what a new outlet costs and earns, as a range.

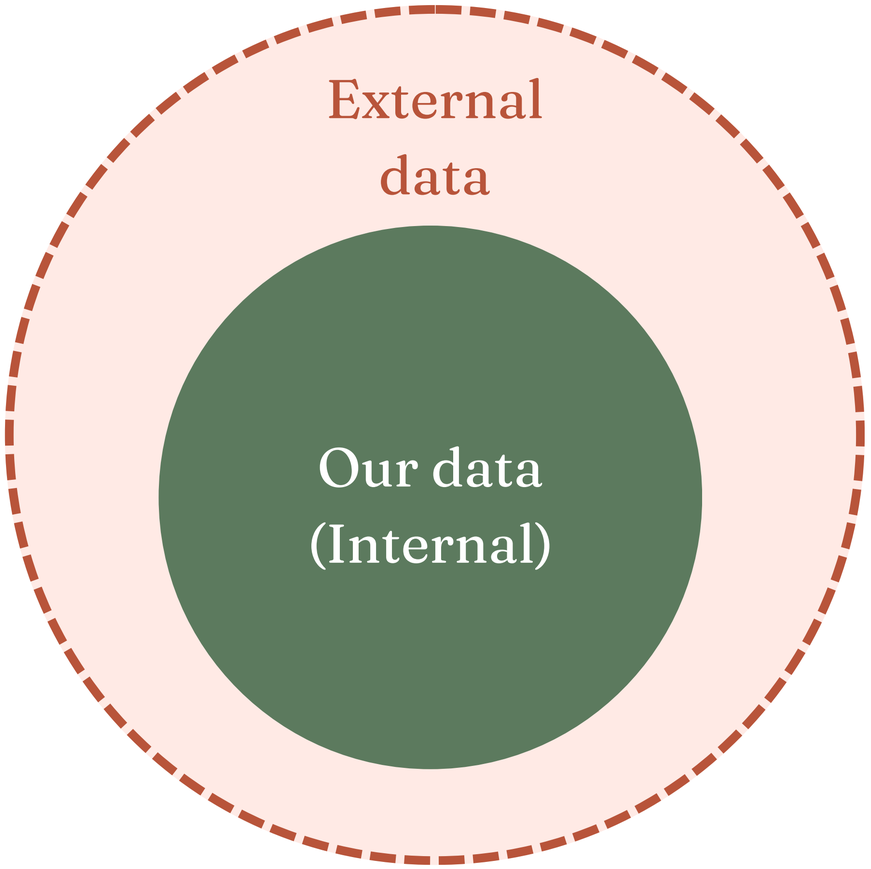

3

I refuse to choose locations from internal data alone.

“ Know what you are measuring before you measure it. ”

Bonus Answer

“ Our data only knows where we already are. ”

To choose where, I need

- \+ Parking and transport
- \+ Local income levels
- \+ Competitors nearby
- \+ Rental cost

Day 30 lesson

“ The job was never the query.
It was knowing which question deserved one. ”

Thursday

Thank you, Priya. You taught me to ask what ‘worth’ means first.

8:06

R
Ritu - Manager
Online

Thursday

Thank you, Ritu. You taught me to share my workload before saying yes.

7:58

A
Arjun - CFO
Online

Thursday

Thank you, Arjun. The ₹12 lakh gap taught me to check every filter.
