Online

Today

Sachin “ Of the people who walk in, how many actually buy? ”

14:15

Door Sensor

4,12,000

entries in August

Order record

1,65,300

completed orders

Today’s question

Name three reasons 40.1% is not the conversion rate.

Bonus question

one of the three is in the numerator, not the denominator. Find it.

AttiQ Café

DAY 10 / 30

My Answer

“ The Sensor counts people. Conversion needs the right ones ”

Stage 1 : Who the sensor counts

- **Customers** ✓
- **Consumers** ✓
- **Window shoppers** ✓
- **Repeated customers** — Reason 1 — **Unique only**
- **Employees** — Reason 2 — **They aren’t customers**

Stage 2 : The order record

Who, what and when purchased

In-Store orders ✓

Reason 3

Orders made outside the store

“ Count the right people, in the right stage. ”

AtliQ Café

Bonus Answer

“ The numerator : not every order walked through the door ”

1,65,300 completed orders

The calculation

$$\textbf{Conversion rate} = \frac{\textbf{Unique customers who purchased in-store}}{\textbf{Unique customers who visited}} \times 100$$

Day 10 lesson

Before you divide, check what each number is counting
