AtliQ Café

Day 15

₹ 12 Lakh

too high, nobody filtered

Day 16

1,240

orders counted three times

Day 17

₹ 9.8 Lakh

store gone inside a join (Dadar)

Day 18

3x

revenue after one table was added

Day 19

47,000

blanks that might mean 0

Day 20

58%

jump after 11 closed days

Today's question

Write the checklist. What do you run before any number leaves your desk?

Bonus question

Which of the six would your checklist have missed?

AtliQ Café

DAY 21 / 30

My Answer

“ Before any number leaves my “desk, it passes these checks. ”

✅ **Purpose**
What decision does this support?

✅ **Daily average**
Revenue / days traded, not totals

✅ **Filters**
Define what to include and exclude

✅ **Re-confirm**
A query that runs can be wrong

✅ **Duplicates**
One row per order, values distinct

✅ **Totals match**
Report total = orders table total

✅ **Blanks**
What do 0 and blank mean here?

✅ **No assumptions**
Unclear? Ask before you answer

“ Run all eight, every time, even when you are sure. ”

AttiQ Café

DAY 21 / 30

Bonus Answer

“ We cannot say what we will miss. We forget to check things. ”

1 [?] 2 [?] 3 [?] 4 [?] 5 [?] 6 [?] 7 [?] 8 [?]

Technical

Silent issues

JOINs that drop or multiply rows.
Missing data that leaves no trace.

Business

Requirements only people know

What a blank means. The definition.
What the question is really for.

Day 21 lesson

No error message does not mean no mistake.
Check before you send.
