Tuesday

I need revenue split across all 9 categories for the quarterly review.
11:00

The revenue is already in the pie chart on my slide. Does it look okay?
11:02

Quarterly Review

Today's question

Nine categories in a pie. What do you tell her, and what do you suggest instead?

Bonus question

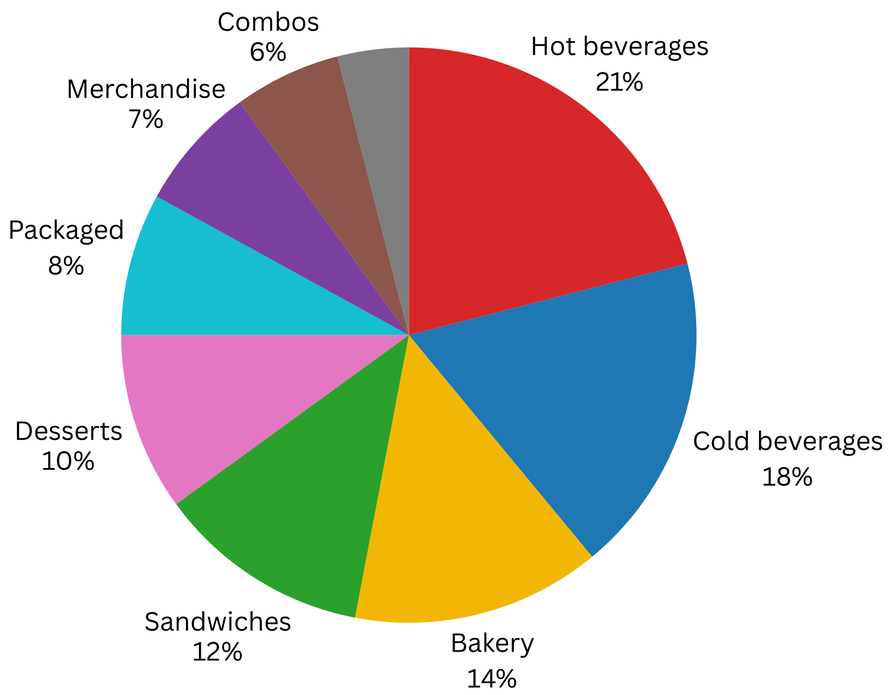

There is one version of this slide where a pie would genuinely be the better choice. Describe it.

AtliQ Café

My Answer

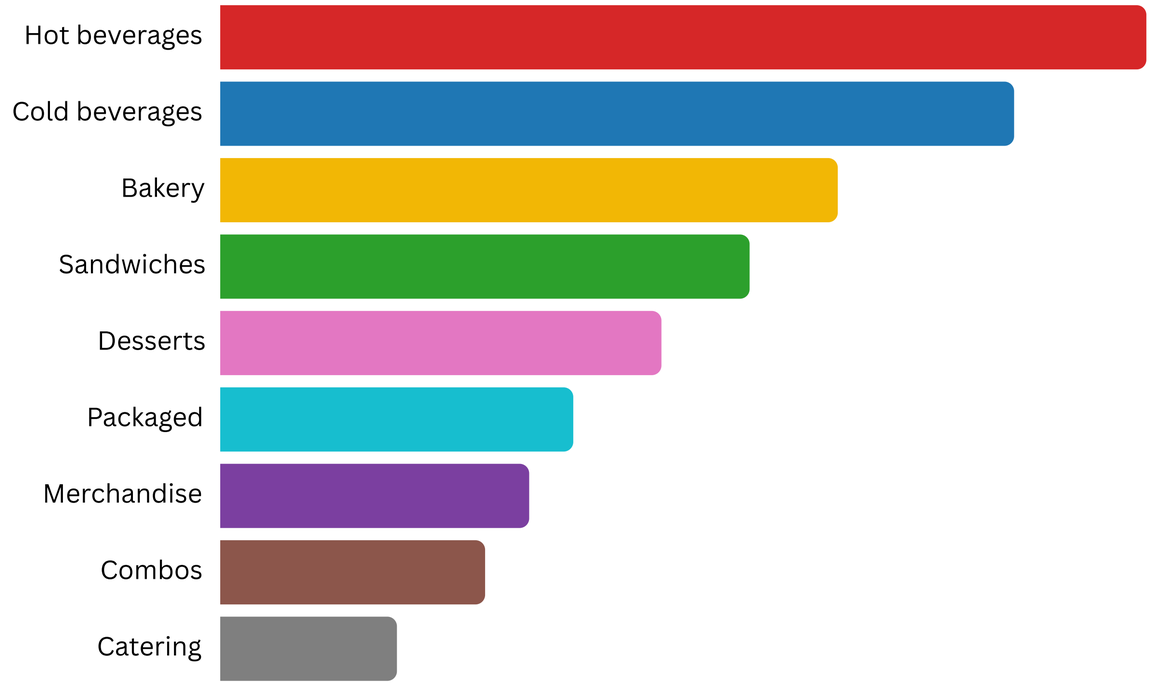

“ Same nine numbers. One chart you can read ”

Pie chart

- Slices too thin
- Labels hard to read
- Hard to compare sizes

Bar chart

- Bars easy to compare
- Labels easy to read
- Sorted high to low

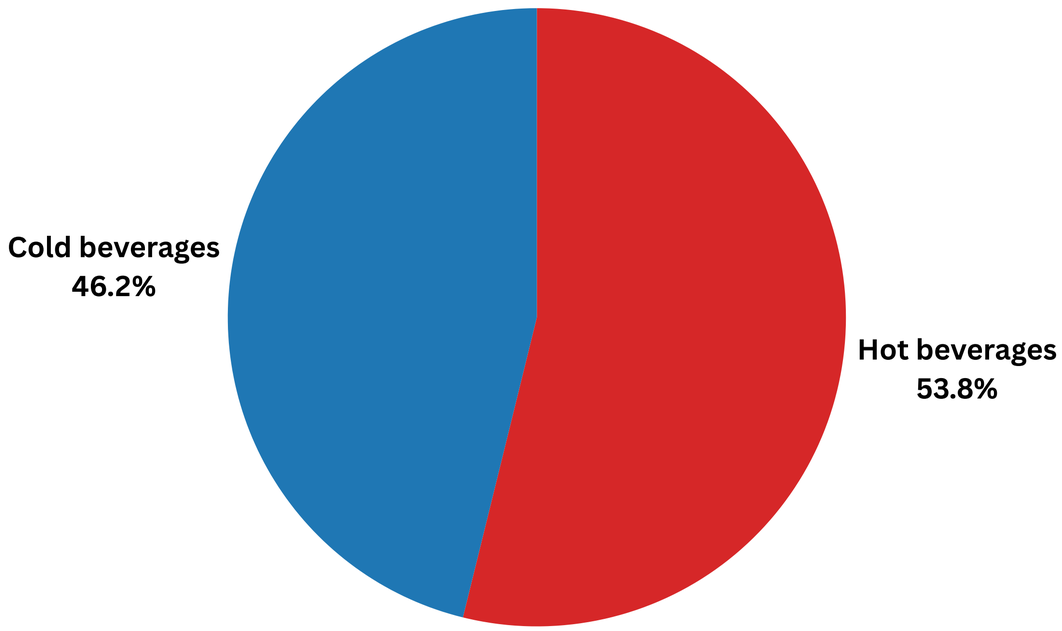

“ Keep the data. Swap the chart. ”

AtliQ Café

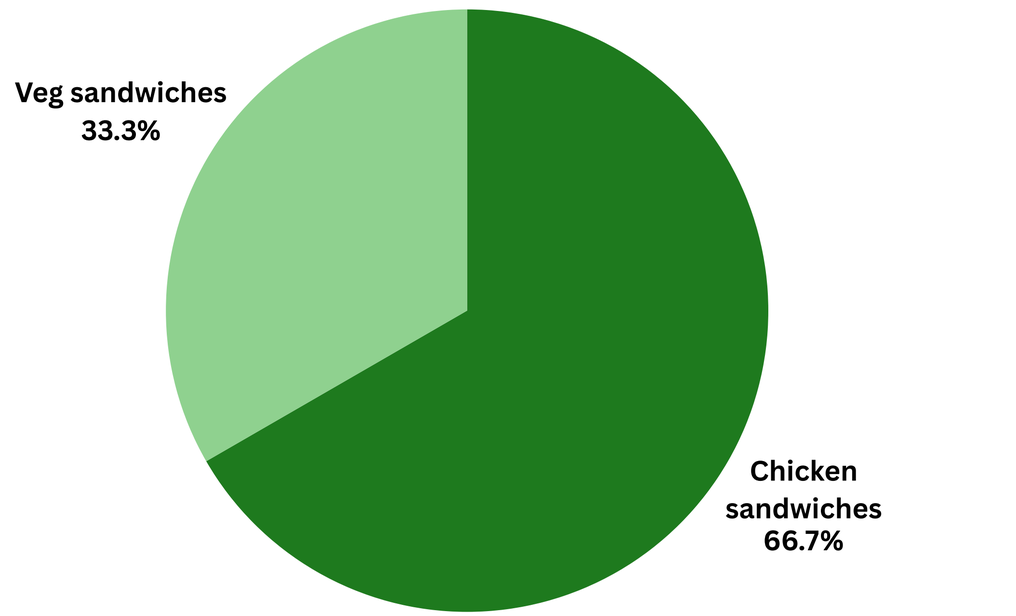

Bonus Answer

“ Few categories. That is a pie chart ”

Hot vs Cold (revenue share of beverages)

Veg vs Chicken (revenue share of sandwiches)

When a pie chart works

- Only 2 or 3 categories
- Parts of one whole
- Focus on the proportions

Day 22 lesson

“ Fit the chart to the question, not to the template. ”
